WE ARE HIRING

ASSISTANT CONTROL & INSTRUMENTATION ENGINEERS VACANCY: SECUNDA OFFICE REFERENCE: 2024/071

WORK DESCRIPTION:

Engineers will be exposed to the detail design and engineering of plant control systems and of solutions to problems experienced with plant processes in the petrochemical field. Handling technical and engineering challenges that may arise from instrumentation field work being carried out. Assisting with drafting of technical specifications for procurement of services and equipment from suppliers.

REQUIREMENTS:

- Minimum qualification of a B Eng/BSc Eng degree in Chemical, Mechatronic or Electronic Engineering.
- 0-2 years' experience as a Control and Instrumentation Engineer in the petrochemical environment.
- An affection for detail design and drafting abilities in the process control environment will be an advantage.
- Above average insight into the operation of plants and equipment. Candidates demonstrate their abilities by means of examples and their ability to explain this with the help of on-the-spot freehand sketches.
- First-hand experience of driving to get tasks done. Be able to share by means of examples.
- Leadership and organizational skills, be able to work independently and in a team, self-starter, "go-getter".
- Good interpersonal relations with the ability to market services.
- Good report writing skills in the English language.
- Good communication skills with the ability to comprehend explanations of complex systems and problem statements.
- Ability to climb on ladders and equipment up to 120m high and to enter confined spaces.
- Organized and self-disciplined.
- Valid driver's license with own transport (Code B / EB) and the ability to drive vehicles with manual transmission.

EQUITY STATEMENT: MegChem supports the appointment of previously disadvantaged individuals.
