

Junior Production Engineer – Truck Body Production Line

Job Overview:

We are looking for a motivated **Junior Production Engineer** to join our truck body production line. The successful candidate will assist in the manufacturing process of high-quality truck bodies, ensuring efficiency, safety, and adherence to industry standards. **Engineering graduates** are welcome to apply, making this an ideal opportunity to start a career in a fast-paced, growing industry.

Key Responsibilities:

- **Production Monitoring**: Assist in overseeing the daily production of truck bodies, ensuring the process aligns with design specifications and safety standards.
- **Process Optimization**: Work with senior engineers to identify areas for improvement in production efficiency and implement solutions.
- **Quality Control**: Conduct inspections and quality checks to ensure that all truck bodies meet industry standards and customer specifications.
- **Technical Support**: Provide hands-on support to the production team, troubleshooting any technical or operational issues.
- **Safety Compliance**: Ensure that all safety protocols and regulations are strictly followed on the production floor.
- **SOP Development**: Assist in drafting and updating Standard Operating Procedures (SOPs) to ensure clarity, consistency, and compliance across the production process.
- **Reporting & Documentation**: Assist in preparing detailed reports on production metrics, material usage, and overall process performance.

Skills & Qualifications:

- Engineering Degree: Ideally in mechanical or industrial.
- **Technical Proficiency**: Basic understanding of manufacturing processes, particularly related to vehicle or truck body production.
- **Problem-Solving Skills**: Ability to identify and resolve issues within the production line efficiently.
- Attention to Detail: High attention to detail, especially regarding quality assurance and safety.
- **Communication Skills**: Able to work in a team-oriented environment and communicate effectively with production staff and management.

Experience (Desirable but not essential):

- Exposure to vehicle or truck body production processes.
- Familiarity with industry standards such as ISO or other quality management systems.
- Experience with CAD software or other engineering design tools is a plus.

Engineering graduates are strongly encouraged to apply, as this position offers an excellent entry-level opportunity with room for professional growth and career advancement.

Salary Range: R 18,000.00 – R 22,000.00 per month

Starting Date: 13th January 2025

Location: 19 Brug Street, Stikland, Cape Town, South Africa
